# Project 3 Interim Report

Group Members' Names: Babacar Diouf, Salahudin Farah, Rezkath Awal

Group Members' X500's: diouf006, farah176, awalx003

-Screen capture of the terminal messages showing `wget` request and its response.

-Plan for work distribution among group members

So far we have synchronous meetings to look into the material and perform any coding necessary. Thus, we are all equally contributing on each function that needs to be implemented

-Plan for extra credit A and B. If you are planning to implement them, please state your idea/algorithm for each extra credit options.

So far, there are no plans of attempting the Extra Credit A. However, we plan to attempt the extra credit B if we finish and test the regular steps to be working 2 days earlier before the due date of the project. Our idea is to deal with it is to implement a circular queue where we can enqueue and dequeue cache entries according to our purposes.
